## 1 · Executive Rate Summary

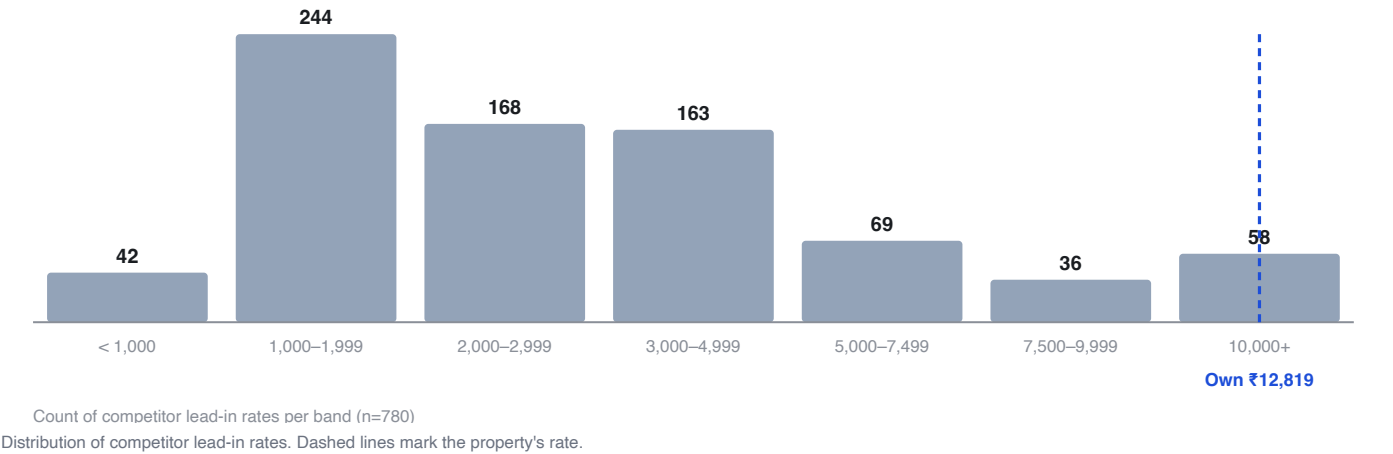

|                                           |                                          |                                            |                                              |
|-------------------------------------------|------------------------------------------|--------------------------------------------|----------------------------------------------|
| LEAD-IN ADR<br>₹12,819<br>₹11,663–₹14,076 | PRICE INDEX<br>127<br>rank 47/63 in band | MARKET MEDIAN<br>₹2,567<br>780 competitors | MARKET SPREAD<br>444.44x<br>₹450 – ₹1,99,999 |
|-------------------------------------------|------------------------------------------|--------------------------------------------|----------------------------------------------|

The property sells a single rate product (Villa), so it holds one position in the market. Every comparison uses a **lead-in rate** — the cheapest available room per night — on a single normalised basis.

**Unit — above the band.** Index 127 against a band median of ₹10,085, ranked 47 of 63. 3 competitors sit within ±6% of the current rate. Holding a premium at this level needs the date-by-date evidence in sections 4–6.

## 2 · Market Rate Structure

|                          |                          |                  |                          |                           |
|--------------------------|--------------------------|------------------|--------------------------|---------------------------|
| LOWEST RATE<br>₹450      | LOWER QUANTILE<br>₹1,600 | MEDIAN<br>₹2,567 | UPPER QUANTILE<br>₹4,463 | HIGHEST RATE<br>₹1,99,999 |
| IQR<br>₹2,863<br>Q3 – Q1 |                          |                  |                          |                           |

**Why whole-market comparison is rejected.** At a **444.44x spread** (CV 2.23) this set spans very different product classes. Measured against all 780 competitors the unit indexes 499 — an artefact of range, not a finding. All positioning in this report therefore uses a ±40% competitive band around each product's own rate.

**Dense band, minimal pricing power.** 62 competitors price within  $\pm 40\%$  of this unit, 3 of them within  $\pm 6\%$ . Rate moves here are highly substitutable.

4 · Rate Trends Over the Booking Window

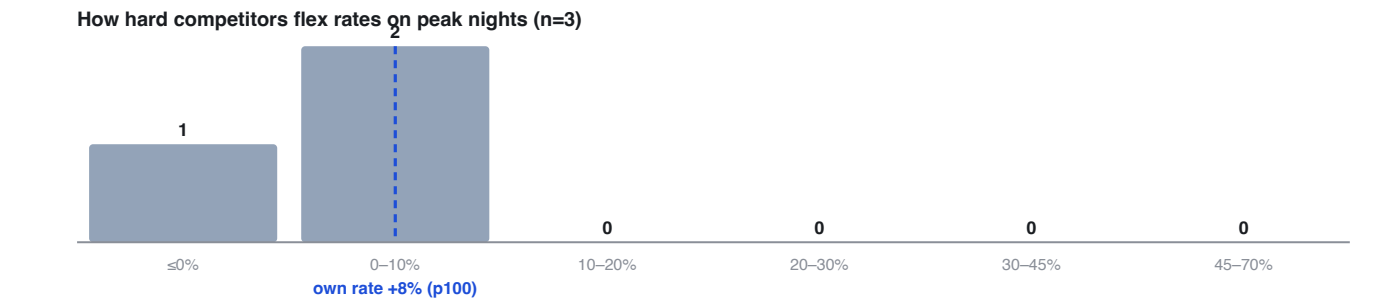

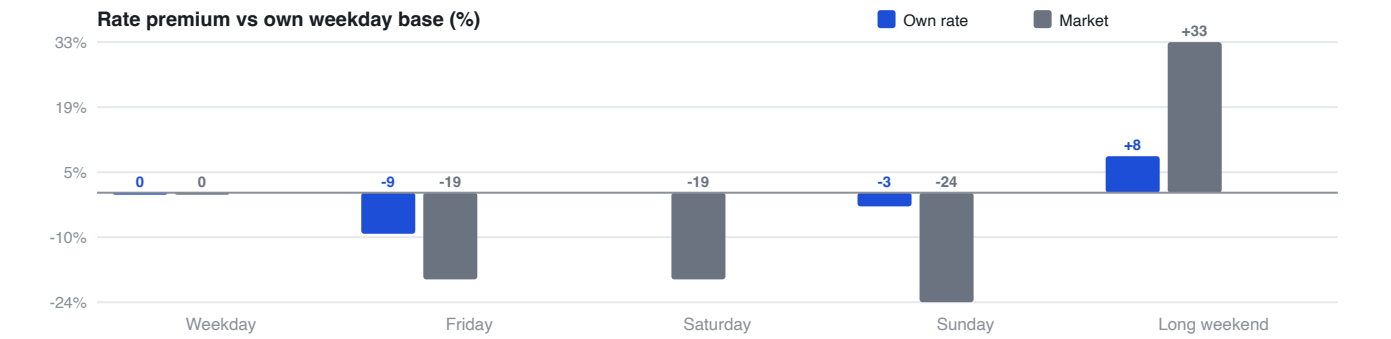

Night-by-night comparison needs a full 30-night curve per competitor. 3 of 780 priced competitors currently carry one, so the trend comparisons below run against those 3 — the tracked competitor set — while sections 2–3 use all 780 market rates.

**No comparison line for the room.** None of the 62 competitors in the room's price band currently has a 30-night curve, so only the property's own rate movement is shown. Link some of those competitors and re-run `refresh.js` to enable the comparison.

Demand here is inferred purely from competitor rate movement — the dates on which the market raises its own median. No availability or occupancy input is used.

6 · Rate Risks

- 1 · **Thin floor beneath the unit.** The nearest cheaper competitor is StayVista at Casa PuMa with Pool & WiFi at ₹12,375, 3% below this rate, and the nearest above is The Zuri White Sands, Goa Resort & Casin at ₹13,128 (+2%). That leaves very little room to respond to an undercut.
- 2 · **The unit sits in a crowded band.** 62 competitors within ±40% and 3 within ±6% means rate is not a defensible differentiator at the current level.
- 3 · **Unit rate movement.** CV 0.08 (0th percentile of competitors) across the window, peaking at +8% over weekday. That is in line with or below peer volatility.
